TUESDAY FEBRUARY 17, 2026—3:15PM TO 4:30PM
IN-PERSON AND ONLINE (VIA ZOOM)
AGENDA**

1.0 CALL TO ORDER and INDIGENOUS LANDS ACKNOWLEDMENT

The District of Wells is located in the shared ancestral territories of the Lhtako Dene Nation, a shared territory also with Dakelh (Carrier) and Secwépemc (Shuswap) Peoples. Several nations have history and territory in the area, including Lhatko, Nazko, Lhoosk'uz, Ulkatcho, ?Esdilagh, Xat'süll, Simpcw, and Lheidli. Evidence of early indigenous settlement in the region dates back over 10,000 years.

5.0 UNFINISHED BUSINESS

5.1 Strategic Priorities Projects—Incremental Information Only

- P002—Waste Water Project—Collection System and Treatment. The Project is estimated at \$26 million to \$31 million. Overland waste water outfall installed on Emergency Basis; a new underground waste water outfall is being installed—80% complete, and a short overland extension will have to be used over the winter for the last 134 metres; **permit approval received for remainder of 8" vertical drill of the outfall line.**

P002—OPTION 2 (REVION 1) is the Preferred Option at this time.

OPTION 1 – FREE WATER SURFACE WETLAND

This option is a three-step treatment process. Step 1 uses the current lagoon for flow attenuation and primary treatment and constructs a new identical lagoon in parallel to satisfy the municipal wastewater regulation (MWR) redundancy requirements. This will allow Wells operations staff to isolate and dewater each cell to handle operation and maintenance as required.

Figure 1: Option 1 - Free water surface wetland

OPTION 2 (REVISION 1) - ROTATING BIOLOGICAL CONTACTORS

Option 2 uses rotating biological contactors (RBCs) as the main treatment method. Raw wastewater flows through a screening system to remove any large objects, then proceeds directly to the RBCs. In terms of mechanical wastewater treatment, RBCs are a simple treatment solution that can achieve very good effluent quality. No settling is provided beforehand to minimize heat loss from the wastewater, which has been measured to be seasonally very cold in Wells.

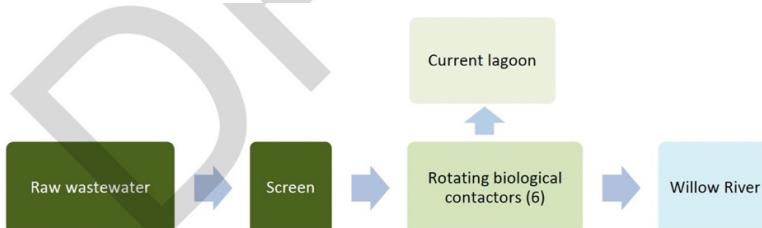

Figure 2: Option 2 – RBC process

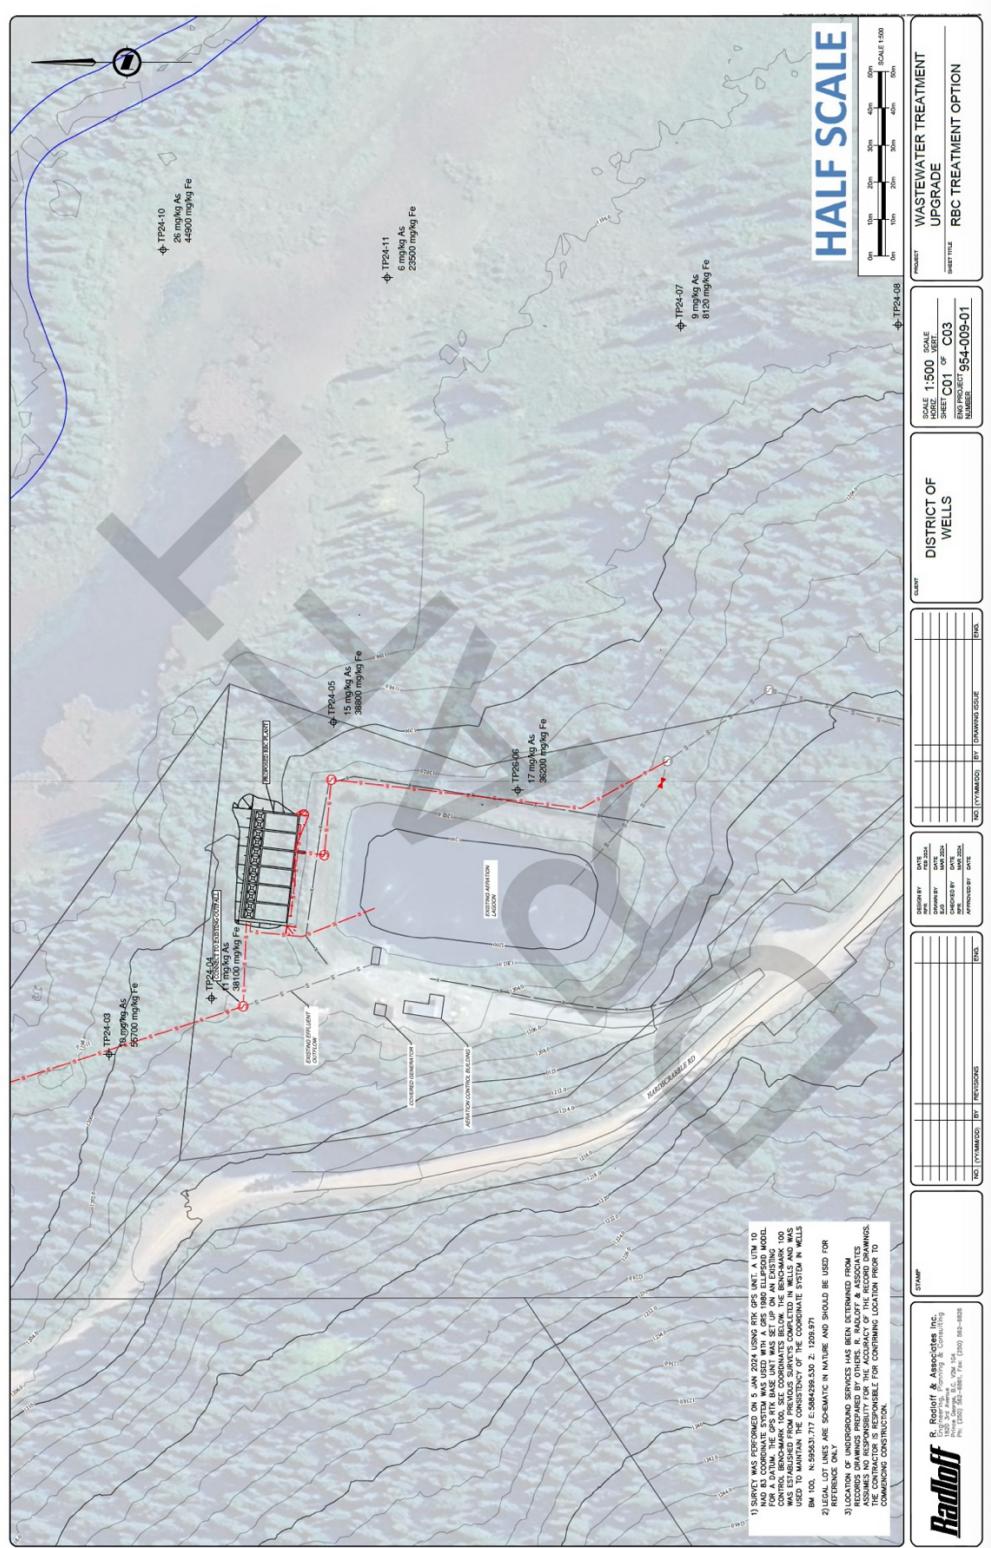

OPTION 3 (REVISION 1) – AERATED LAGOONS AND AERATED SUBSURFACE NITRIFICATION BED

This option involves refurbishing the current lagoon with a new liner and aerators, adding a second larger lined aerated lagoon, and installing a subsurface aerated gravel bed covered with a layer of mulch. A new building would be constructed to house the blowers for the aeration system, replacing the existing structure.

Press Release

2025 November 28, 12:50pm—Final

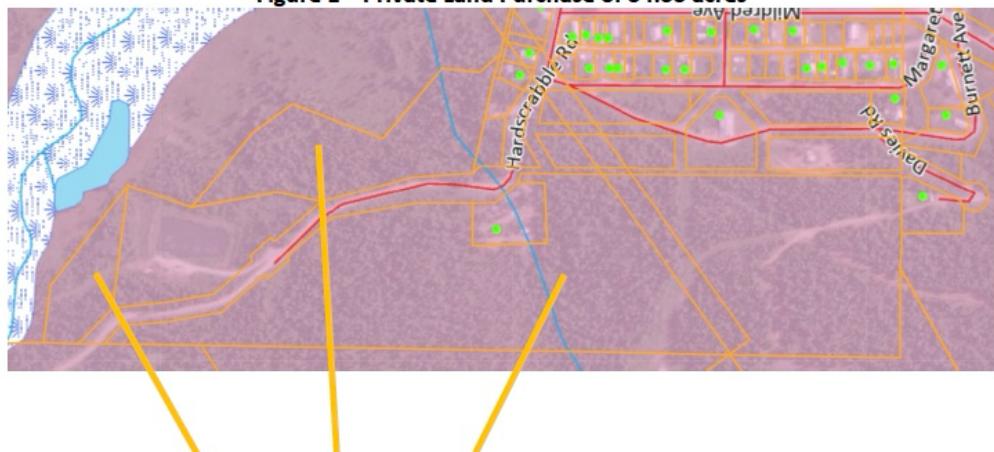

The District of Wells Purchases Private Land in Wells, BC for Infrastructure, Potential Future Subdivision, and Wildfire Interface Protection

In partnership with the Province of BC, the District of Wells has purchased private land in Wells, BC for: Infrastructure, a potential future new subdivision, and wildfire interface protection. The 34.33 acres property was purchased from Ambrus Logging Ltd for \$950,000 and contains three distinct sections (see Figure 1).

The land purchase brings the existing water and wastewater “right of ways” into the possession of the District of Wells, for major upgrades to its Wastewater (see Figure 2) and Water System as per its new Official Community Plan, as Wells plans for partnerships with Lhtako Dene Nation for growth potential to 1000 citizens over the next three decades.

In addition, the land purchase opens the opportunity for a new subdivision on part of the property (see Figure 3), recreation and trails development, additional water tower location, new wastewater force main, storm water management, expanded water treatment plant needs, fire guards & wildfire fuel treatment management, and terrain stability investments. Any wood fibre net income will be applied to the Wastewater Upgrade Project.

District of Wells—Strategic Priorities Projects Tracking Grid
Version 11—2025 12 16

Overview

In June of 2022, the Municipal Affairs—Province of BC provided a Municipal Advisor, Gary Nason, to support the District of Wells with support to review Operations and Governance of the District of Wells. Out of that process, this Project Tracking Grid has been created and will be maintained and reported on at Regular Council meetings going forward.

Categories

Categories 1 to 3 were created to help place priority levels on projects and make clear what projects are ongoing and closed/completed. The following information clarifies each category:

Category 1: “Best efforts made to complete the project in 2026, or continue active work on the project if the project is multi-year and will carry-over to 2027 or beyond. (i.e. Major infrastructure or building upgrades largely dependent on external grant funding.)

Category 2: Subject to sufficient budgetary/grant funds and staffing capacity, commence project in 2024, with no commitment to complete the project in 2026 and carry forward to a future year if appropriate.

Category 3: Reconsider dependent upon potential external grant availability and/or sufficient internal staff and budgetary capacity. Defer the project to at least 2026, or later in the remainder of a Council mandate.

Appendix A: Completed Projects

Appendix B—P044 Series: Operations Projects

The following pages show the “Grid” of Projects for the District of Wells is organized in the Categories outlined above. Each Project has its own electronic and paper-based folder/file that holds all the details on all the Project.
