### Nature Inspired Playgrounds

The NU-Edge® play system is designed around the striking dichotomy of both nature and city life. With towering rooftops, nature-inspired play events, and non-linear climbing paths, this bold fusion allows kids to jump into a world of discovery, imagination, and adventure—no matter where they live.

### Natural Play Structures with an Urban Feel

With both rustic features and urban-inspired play elements, Little Tikes Commercial has created a bold new idea of what playground equipment can be.

### 5" Structural Posts

Our 5 inch structural posts, don't sway or flex, and utilize a four-stage paint process, including stainless-steel pre-treatment with super-durable polyester paint that is built to stand up to our winters.

\* Smaller posts are utilized for non structural components.

### 48" Decks Rule!

Large 48 inch decks allow more kids to play at once. Parents can also get into the fun and easily move around the structure.

48"

### Play Value is #1

Play is critically important to children's physical, mental and social development, and we take it seriously. Our designers deliver on this vision with components that challenge children's minds and bodies.

### Peace of Mind

We stand behind our products with confidence, including a **15-year warranty** on all rigid main play structure plastics, steel and vinyl-coated components.

Playground Replacement Project

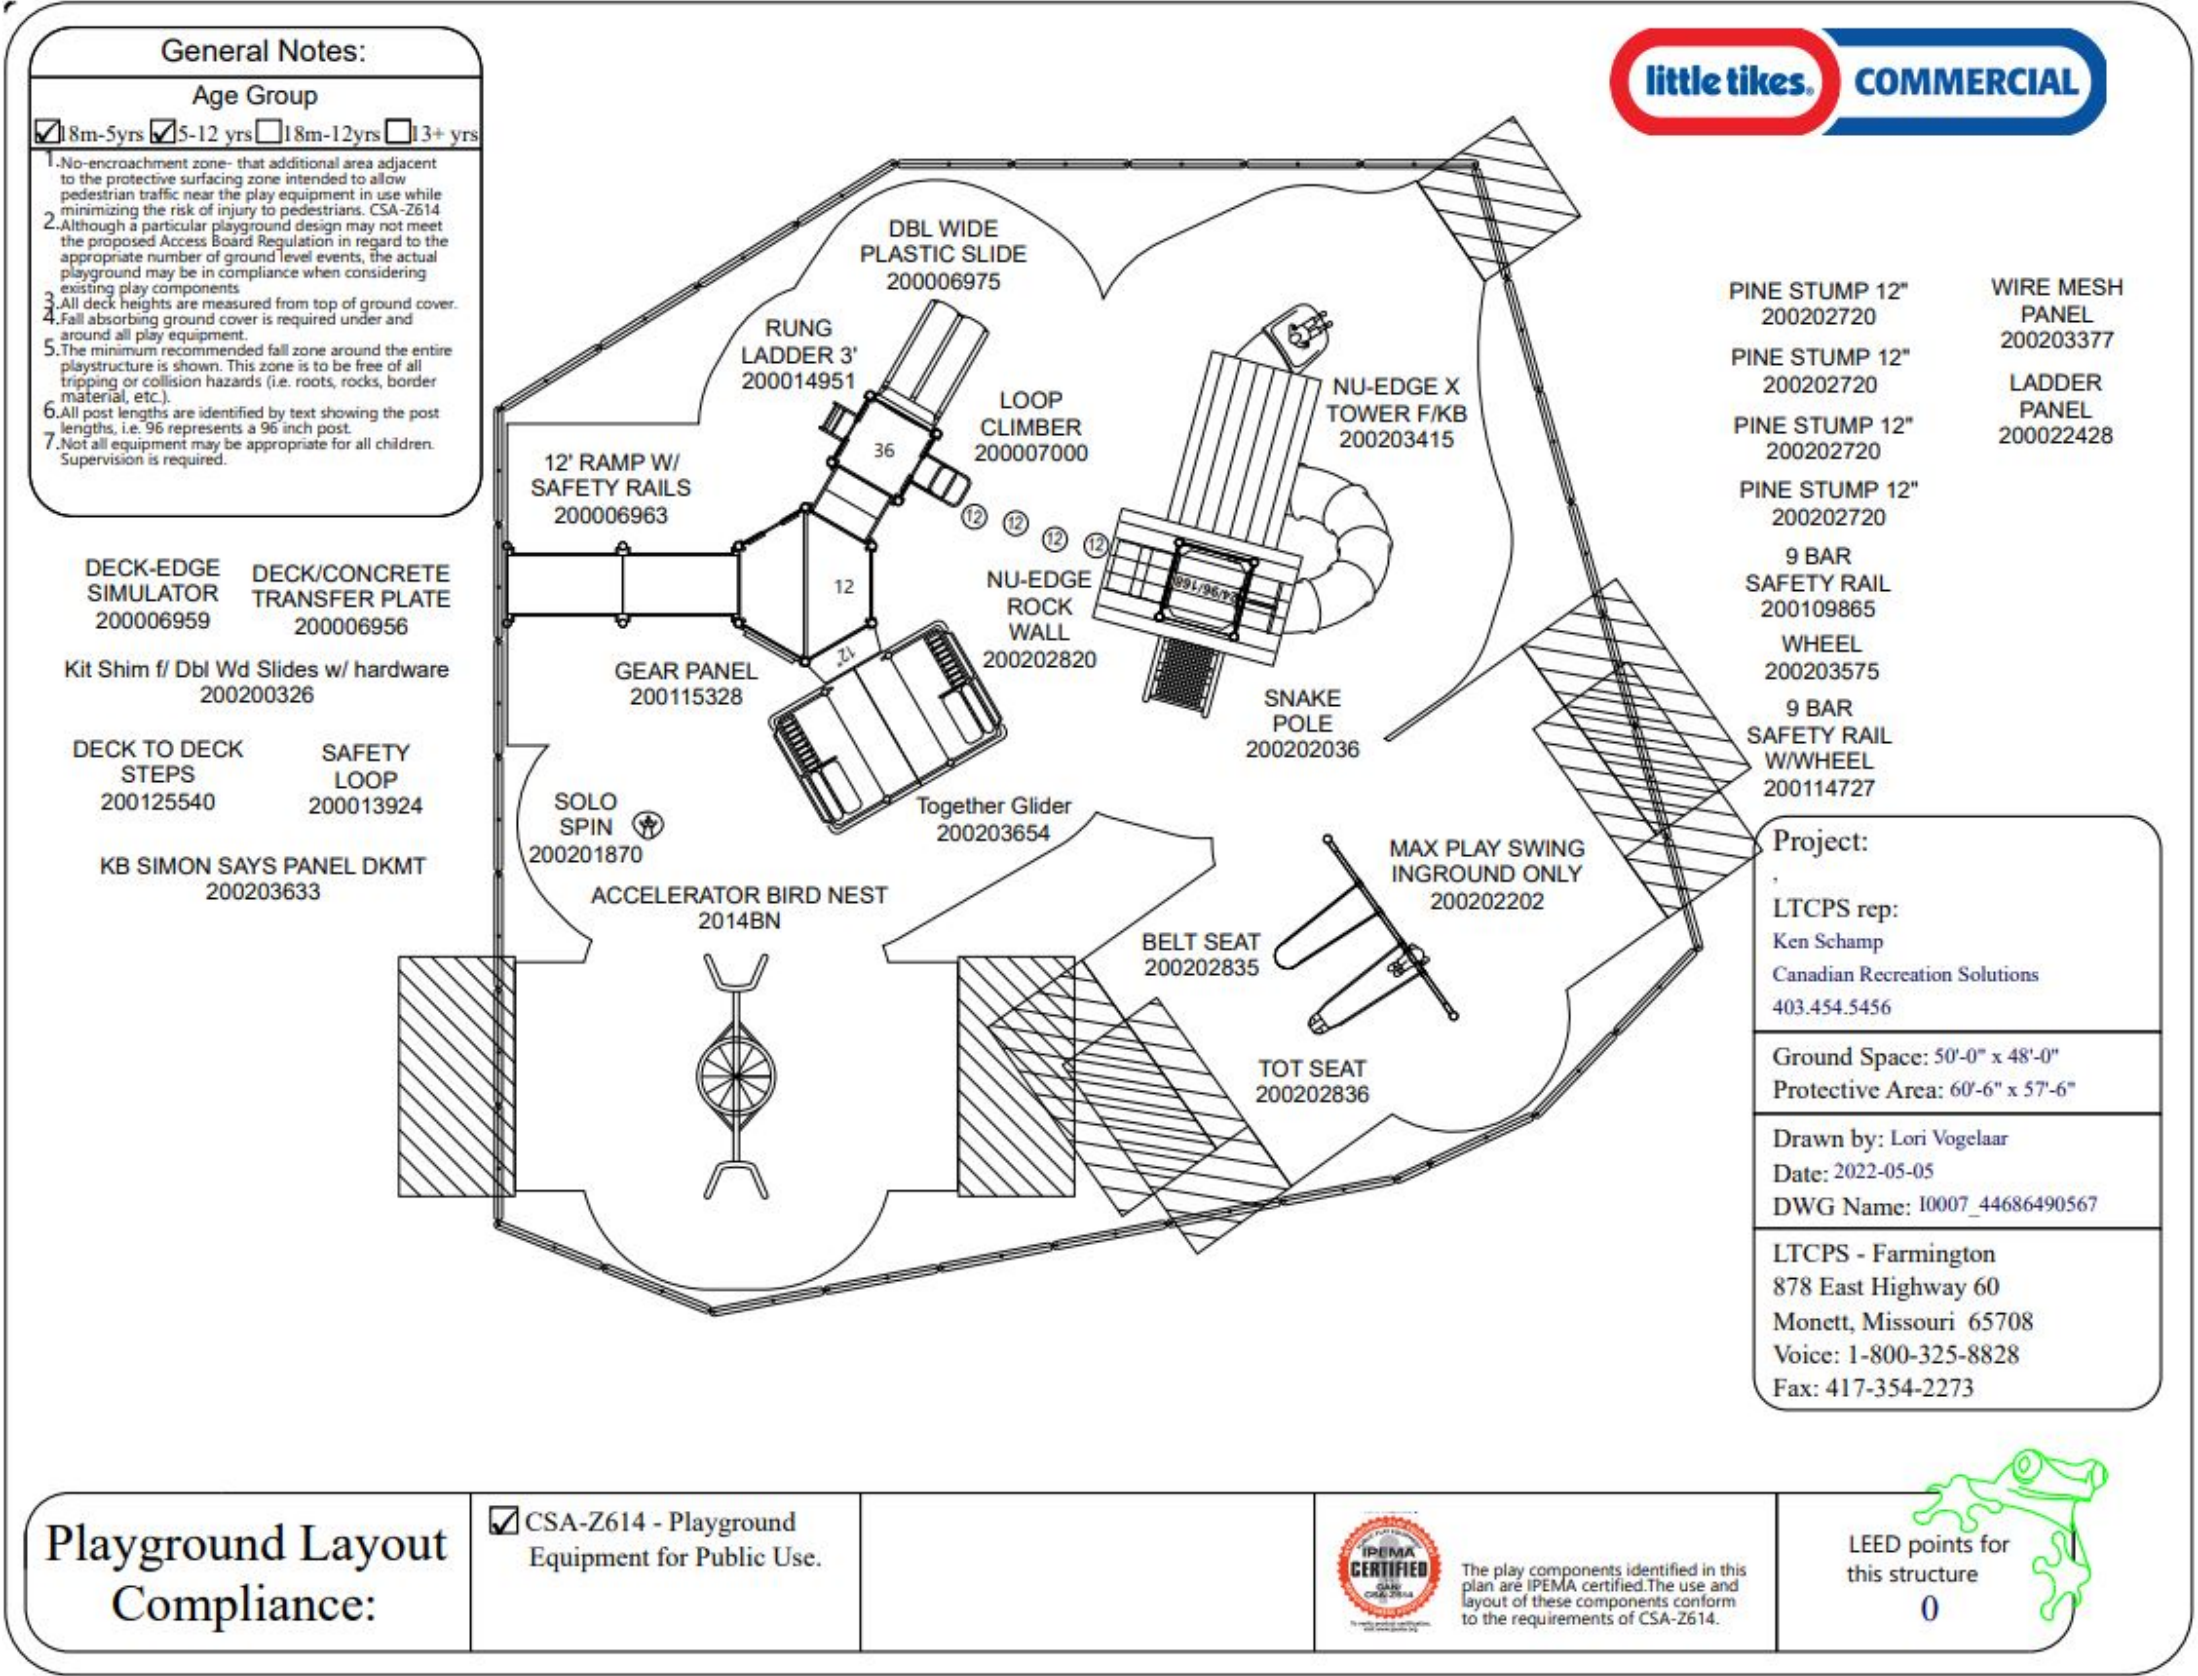

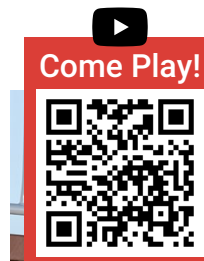

Loop Climber

The Loop Climber by Little Tikes utilizes a unique design that is both fun and challenging. Children from 18 months to 12 years will have their hand eye coordination tested as they climb into the play structure. The Loop Climber can also be used as a stealthy hide out spot in popular playground games like "Grounders."

CHALLENGING

Nu-edge X Diamond Climb

Internal ropes provide challenging and varied climbing paths to get from deck to deck on the Nu-edge Tower structure.

NATURAL

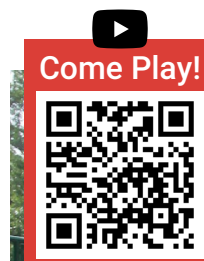

Pine Stumps

Our realistic Pine Stumps are great for balance and coordination. The varying heights and shapes create a challenging climbing experience as kids maneuver from one stump to the next. The Pine Stumps also serve as a great link between independent events and larger play structures. Available in short, medium, and tall sizes.

Snake Pole

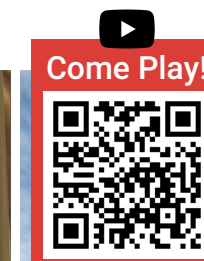

Slither your way to the top of the playground with the Snake Pole! This winding climber provides a vertical pathway into the play structure, and is a more advanced alternative to conventional ladders. Children will improve their hand eye coordination as they step from rung to rung. Perfect for kids aged 18 months to 12 years.

NATURAL

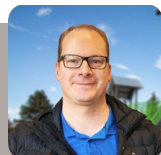

Nu-Edge Rock Challenge Wall

The Nu-Edge Rock Challenge Wall provides kids with a fun new climbing experience. Made of our patented Naturtek material, the Nu-Edge Rock Challenge wall simulates the look and feel of real stone. Children will feel like they are climbing up an actual mountain as they play on this challenging vertical climber.

Nu-edge X Tower

We've taken the urban, edgy promise of our popular Nu Edge structures to the next level with a 3 story tower and the longest tube slide in the industry. The Nu Edge tower features a 14 ft. Tunnel Spiral Slide and 2 Diamond Climbs. A full enclosed tower for a level of excitement and perceived risk while playing.

INCLUSIVE

Gear Panel

Get the wheels turning with our interactive Gear Panel! This panel encourages tactile play and develops fine motor skills, which is great for children with sensory processing issues. The Gear Panel also helps with cognitive learning through cause and effect. Kids will quickly learn how the gears work together to make the machine go!

SENSORY

Simon Says Panel

The Simon Says Panel allows kids to play cooperatively. To play this game, spin the coloured wheel, and the image that lands on the arrow shows you what Simon wants you to do. The child that completes the activity first uses the striker to ring the bell. You can also keep score by moving the point stack through the wavy line.

Ladder Panel

Rather than using conventional steps, the Ladder Panel offers a fun and easy way for kids of all ages to climb. Children will practice their hand eye coordination each time they go in and out of the play structure. Use the Ladder Panel as a unique vertical pathway, or duck behind it during a game of hide and go seek.

Steering Wheel

INCLUSIVE

Accessible Ramp

Wide accessible ramps and decks allow for children, parents, and caregivers using mobility devices to move throughout the playground. Providing these ramps and decks enhances play experiences by allowing everyone to have access to the socialization panels and activities. This way everyone can have fun together!

Deck-to-Deck Steps

Easily transition between play structures with these Deck-to-Deck Steps. They feature vinyl clad stairs that give kids plenty of grip as they run from one deck to another. The Deck-to-Deck Steps also provide continual linkage within the playground by connecting play elements of different heights. Available in a fully inclusive ADA model.

VESTIBULAR

Accelerator Swing

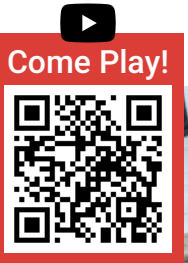

Built with a large disc and protective rubber bumper, the group swing incorporates the motion of a traditional swing with the added fun of interactivity.

EXCLUSIVE

Together Glider

The Together Glider enables children who use a wheelchair to play alongside their friends and build valuable social skills. The child simply wheels up the glider's ramps, while their friends sit or stand to rock the glider back and forth. With a 70 sq. ft. deck, the Together Glider can accommodate up to 10 children at once.

Solo Spin

The Solo Spin by Little Tikes utilizes vestibular movement to improve balance, coordination, and perception of gravity. Pretend you're at an amusement park, or training to be an astronaut - there's no limits to what you can imagine. Use it as an independent activity, or get a friend to spin you as fast as they can!

360° Bucket Tot Seat

The 360° Bucket Tot Seat provides an inclusive play experience, allowing children from 2 - 5 years to enjoy the swing set. Children will develop their sensory skills as they perceive their body in relation to gravity, movement, and balance. The 360° Bucket Tot Seat is available with or without a swing chain for an 8' top rail.

VESTIBULAR

Max Play Swings

Swing away the day with the Max Play Swings! Children will develop their sense of gravity and direction, improving their coordination during daily activities. The Max Play Swings are compatible with several inclusive seats to provide a fun swinging experience for children of all ages and abilities. Available in 6' or 8' post heights.

Double Wide Slide

Add social interaction and competitive play to your playground with the Double Wide Slide! Children from ages 2 - 12 will enjoy racing one another in a friendly competition, building strong social skills and good sportsmanship. The Double Wide Slide is made from durable, non-corrosive materials that will last for years on end.
